No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

	Sequences were basecalled with phred and vector was masked with
	crossmatch (see http://genome.washington.edu). Sequences were then
	trimmed from both ends to remove low quality bases and masked
	vector.

/GLOCE="Vector: pT73-Pac (Pharmacia) with a modified polylinker; Site 1: ECOR I; Site 2: Not I; UI-D-GCI is a normalized library derived from UI-D-GCO: The library was constructed according to Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dr primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into pT73-Peac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)B tail. The sequence tag for this library is TACCTCGAGA: Tissue was obtained from the Provasoli-Guillard National Center for Culture of Marine

Genemalization and subtraction: two approaches to facilitate gene discovery AUTHURS DOUBLAL Genome Res. 6 (9), 791-806 (1996) MEDLINE GONGANES TOTAL Genome Res. 6 (9), 791-806 (1996) MEDLINE BRBSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSS	portylinker; Sized library derived from UI-D-GCO. The library was constructed according to Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into pTTA-Pac vector. The oligonalclectide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)18 tail. The sequence tag for this library is TACCTGGAGA. Tissue was obtained from the

Genome Research, 6:791-806, 1996. First strand cDNA
synthesis was primed with an oligo-dT primer containing a
Not I site: Double stranded cDNA was ligated to an EcoR I
adaptor, digested with Not I, and cloned directionally
into pT7T3-Pac vector. The oligonucleotide used to prime
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       CK412358 602 bp mRNA linear EST 08-JAN-2004 UI-D-GC1-aam-j-16-0-UI.sl UI-D-GC1 Alexandrium tamarense cDNA clone UI-D-GC1-aam-j-16-0-UI 3', mRNA sequence.

First strand cDNA Synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an EOOR I adaptor, digested with Not I, and cloned directionally into pT7T3-Pac vector. The oligomucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the

Construction and analysis of a cDNA library from larval midguts of cotton bollworm Helicoverpa armigera

Unpublished (2002)
/note="Vector: pBluescript II SK(-); Total RNA was prepared from midguts of mid-fifth instar larvae of Helicoverpa armigera using the RNAgents kit (Promega). PolyA mRNA was obtained using the Dynabeads mRNA purification kit (Dynal). First-strand cDNA was made by
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Contact: Viadimir Grubor
